

CINEDOMUS PROJECTION SCREENS

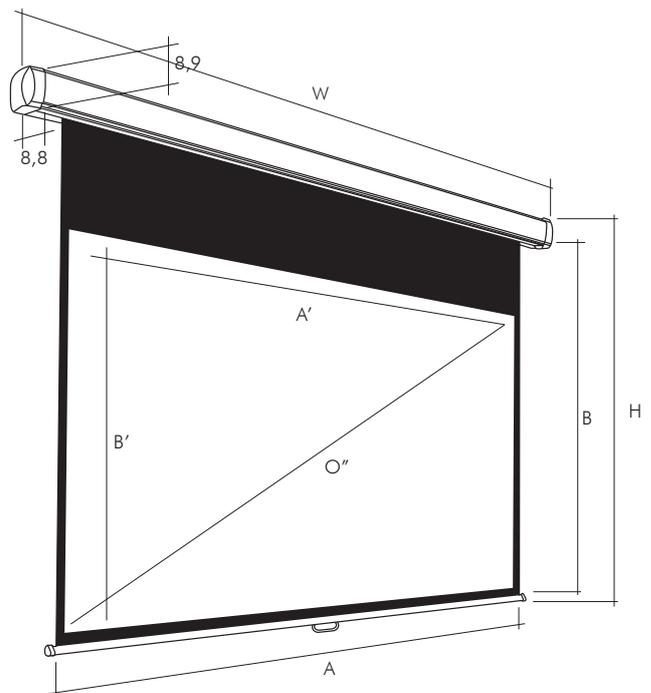

with electrical command, varnished aluminium case

CINEDOMUS is the new range of professional electrical screens, developed and designed mainly for domestic use in home cinemas, but also suitable for any kind of use. Sober design: a sturdy aluminium structure and the total absence of visible screws: the attention to details, the materials used and the construction quality are the common denominators of this product. Operation is quick and silent thanks to the 28 RPM motor, guaranteed for 5 years. The most outstanding aspect is without a doubt the use of the Matt White fabric that, thanks to its stability and planarity, guarantees the to-

tal absence of waves, curls and, most importantly, horrible welds on large formats: the rear black side eliminates any possible interference caused by light sources positioned behind the screen; the outer black borders are decorated with a serigraphy process using a special indelible ink that is resistant to fabric creases that may occur during the rolling phase. Easy wall or ceiling fixing using suspension brackets for free positioning along the length of the case, the CINEDOMUS screens can be fitted, upon request, with remote controls and therefore guarantee the utmost comfort in use.

Technical Features

- **Screens** realised with the following projection fabrics: MATT WHITE (see technical data sheet at pages 3-4-5)
- **Available** in square format 1:1, video 4:3 and also HDTV 16:9, supplied with or without four black outer borders of 5 cm and an extra upper black drop which changes according to the format: the black outer borders increase the definition of the image projected on the screen
- **All screens** in the proposed formats **do not present welding on the projection surface**
- **The screen has to be lowered from the rear side of the box**, it can not be provided with front lowering system; in the case of a wall mounted installation, the screen lowers at 29-45mm from the wall
- **Robust case of extruded aluminium, epoxide powder coating, in white RAL 9010 colour**, section 85x93 mm, with rounded corners; provided with reinforcement on the back side to hold wall fixing clamps; on the lower side a longitudinal slot with rounded edges allows the descend of the projection screen.
- **Internal anodized aluminium tube for fabric wind up** Ø 50 mm, which includes a reliable robust electric motor mounted on special rubber silent blocks.
- **Electric single-phase motor**, CE mark, 5 years warranty from the purchase date, electrical connections 200V - 50Hz, absorption 0,66A, protection IP 44, 28 RPM; in the standard version the motor is fixed to the right hand side
- **Screen up and down electric inverter, standard supplied**
- **Screen up and down limit switches factory adjusted**, possibility of different settings if necessary. The screen can also be stopped at intermediate height by pressing the electric inverter switch
- **Suspension brackets are standard supplied** and can be mounted anywhere along the whole housing length. Brackets are steel made, epoxy powder coated in white RAL 9010 colour, they are suitable both for wall or ceiling installation thanks specific expansion anchors
- **Rounded closing heads of the box**, with a special design made from shockproof ABS in white RAL 9010
- **The lower bar has a pleasant drop shape** form and it is complete with white ABS end caps
- **Supplied in robust double cardboard package** (vulcano type)
- **Product CE certified**, 12 month warranty to the conditions indicated on the manual
- **Accessories on request:** radio remote control
- **Overall dimensions:** screen dimension +18 cm
