SMART Board™ 800 series

interactive whiteboard

Feature availability
The SMART Board 800 series interactive whiteboard supports multiuser writing and common multitouch gestures currently recognized in Microsoft® Windows 7 and Mac Snow Leopard operating systems. SMART Notebook™ collaborative learning software will support certain features, such as freestyle interaction, touch gestures and full object awareness, upon the release of updated software (SMART Notebook 10.7), expected by March 2011.

Experience an extraordinarily natural way to interact with lessons with the SMART Board 800 series interactive whiteboard. It enables two users to start working on lesson activities simultaneously, using their fingers or a pen. With the 800 series, teachers and students can truly collaborate, making lessons more magical and interactive.

Hands-on collaboration

The 800 series represents a new class of interactive whiteboard. As a powerful, multitouch interactive whiteboard, the 800 series enables two users to simultaneously interact on the system's surface, while using different tools or their fingers to write, draw and manipulate lesson content. The interactive whiteboard doesn't have restricted user areas or a separate multiuser mode, so collaborative opportunities are always at your fingertips.*

The magic of touch

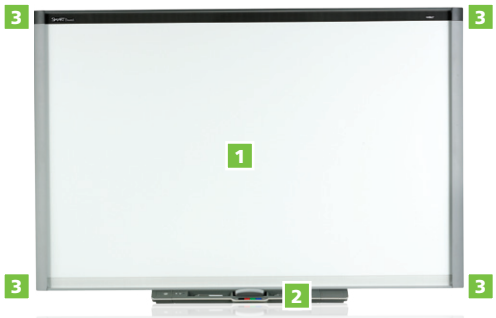
Use simple, intuitive hand and finger gestures to interact with your lesson content. The touch gesture* capabilities of the 800 series make it easy for you to toss, rotate or zoom in on lesson content, or control applications in Windows® 7 or Snow Leopard operating systems. A user can also independently write with a pen, erase with a palm or move objects with a finger – there's no need to access on-screen menus.

Rich in classroom resources

Find thousands of high-quality resources on the SMART Exchange™ website. The SMART Exchange features lessons made specifically for SMART products, including the 800 series – created either by SMART or by third-party developers.

Part of the SMART classroom

The 800 series has a modular design, making it easy to add additional technology and accessories, like SMART projector controls. The interactive whiteboard also integrates with the SMART Document Camera™ and SMART Response™ interactive response systems. And accessories like the SMART mobile floor stand and wireless Bluetooth® connection mean that you can incorporate the 800 series into a variety of learning environments.



1. SMART Board interactive whiteboard – a multiuser interactive whiteboard that enables two users to simultaneously write, erase and manipulate content
2. Multiuser Pen Tray – the advanced Pen Tray automatically detects tool modes
3. DViT™ (Digital Vision Touch) technology – the 800 series uses cameras to distinguish between different actions and respond accordingly

Key features

Multitouch experience

Two users can simultaneously write, perform mouse functions, erase, and manipulate and move objects on the interactive whiteboard surface – and no special tools are required.

Freestyle interaction*

The system enables two users to instantly start working together without having to switch into a separate multiuser mode or work in a confined area. And each user can individually complete actions, like writing in digital ink or moving objects with their fingers.

Object awareness

The 800 series recognizes when a user switches between using a finger, pen and eraser. A user can also write with a pen, erase with a palm and move objects with a finger, without having to press buttons, access on-screen menus or replace tools in the Pen Tray.

Touch gestures*

Use simple, intuitive hand and finger gestures to toss, rotate or zoom in on objects and interact within SMART Notebook software. The 800 series has built-in support for Windows 7 and Snow Leopard.

SMART Ink™

Discover a responsive and accurate writing experience with SMART Ink. It smoothes out the appearance of the digital ink, which improves the legibility of your handwriting as you write over applications, websites and videos. The ink becomes an object that you can move and manipulate.

Save function

Capture your work to SMART Notebook collaborative learning software as a screen shot that you can edit, or save your notes directly into several software applications, including Microsoft Windows versions of PowerPoint®, Word and Excel®, Adobe® Acrobat® and AutoCAD® software.

Durable surface

The 800 series has a low-gloss surface that is optimized for projection. The surface is compatible with dry-erase markers and magnets and is easily cleaned.

Widescreen option

Enjoy more room to work. The wide-format 885 model gives you 20 percent more working space than a standard interactive whiteboard – ideal for classrooms that use widescreen laptops and monitors.

Warranty

The SMART Board 800 series interactive whiteboard has a two-year warranty, which is extended to five years upon product registration.

*Feature will be supported upon release of SMART Notebook 10.7 software, expected by March 2011.

Specifications

SMART Board™ 880 interactive whiteboard

Size
66 1/8" W × 51 1/8" H × 6 1/2" D
(168 × 130 × 16.5 cm)

Active screen area
(maximum interactive, projected image)
61 5/8" W × 46 1/8" H
(156.5 × 117.2 cm)
77" (195.6 cm) diagonal
4:3 aspect ratio

Weight
52.2 lbs. (23.7 kg)

SMART Board 885 interactive whiteboard

Size
78 1/2" W × 51 1/8" H × 6 1/2" D
(199.4 × 130 × 16.5 cm)

Active screen area
(maximum interactive, projected image)
73 7/8" W × 46 1/4" H
(187.7 × 117.3 cm)
87" (221 cm) diagonal
16:10 aspect ratio

Weight
60 lb. (27.2 kg)
