EB-735Fi

Create an impact in any workspace with a large, scalable, interactive display that connects people in or out of the workplace

Transform any workspace with this flexible and scalable display that increases collaboration, productivity, as well as delivering sustainability. Regardless of angles or room layout, every person enjoys uninterrupted, immersive viewing, with space maximised and social distancing made possible, without the unnecessary cost of larger fixed size screens.
Flexibility is paramount with the EB-735Fi, with bright, large scalable display options up to 100" (or up to 110" in 16:6 wide format). Unlike flat-panel equivalents, there are no shadows, glare or blind spots, and the high-brightness laser light source can work even when ambient lighting is also high. Multi-screen interactivity makes collaboration easy and intuitive, while a split-screen feature can show up to four inputs in one large display, preventing the need for addtional displays.

The viewing experience is immersive, with multiple connectivity options enhancing exceptional image and sound quality. For the ultimate in engagement, wireless connectivity (including Screen Mirroring via Miracast) allows everyone to share content from their tablets, mobiles or laptops.

Users can annotate content with pen and (optional) finger touch, alongside advanced whiteboard options. The EB-735Fi also supports additional collaboration and productivity tools, including print, save and email.

When compared to flat panels displays, the EB-735Fi provides multiple display sizes and formats for one fixed cost. It also offers flexible mounting options to deploy a more comfortable view for delegates, is more sustainable and provides a hygienic workspace when used with an antibacterial whiteboard - free from finger marks.
