Important safety instructions

Your projector is designed and tested to meet the latest standards for safety of information technology equipment. However, to ensure safe use of this product, it is important that you follow the instructions mentioned in this manual and marked on the product.

General safety instruction

1. Do not look straight at the projector lens during operation. The intense light beam may damage your eyes.
2. Always open the lens shutter or remove the lens cap when the projector light source is on.
3. In some countries, the line voltage is NOT stable. This projector is designed to operate safely within a mains voltage between 100 to 240 volts AC, but could fail if power cuts or surges of ± 10 volts occur. In areas where the mains voltage may fluctuate or cut out, it is recommended that you connect your projector through a power stabilizer, surge protector or uninterruptible power supply (UPS).
4. Do not block the projection lens with any objects when the projector is under operation as this could cause the objects to become heated and deformed or even cause a fire. To temporarily turn off the light source, press **BLANK** on the remote control.
5. Do not place this product on an unstable cart, stand, or table. The product may fall, sustaining serious damage.
6. Do not attempt to disassemble this projector. There are dangerous high voltages inside which may cause death if you should come into contact with live parts.
Under no circumstances should you ever undo or remove any other covers. Refer servicing only to suitably qualified professional service personnel.
7. Do not place this projector in any of the following environments.
 - Space that is poorly ventilated or confined. Allow at least 50 cm clearance from walls and free flow of air around the projector.
 - Locations where temperatures may become excessively high, such as the inside of a car with all windows rolled up.
 - Locations where excessive humidity, dust, or cigarette smoke may contaminate optical components, shortening the projector's life span and darkening the image.
 - Locations near fire alarms
 - Locations with an ambient temperature above 40°C / 104°F
 - Locations where the altitudes are higher than 3000 m (10000 feet).
8. Do not block the ventilation holes.
 - Do not place this projector on a blanket, bedding or any other soft surface.
 - Do not cover this projector with a cloth or any other item.
 - Do not place inflammables near the projector.

If the ventilation holes are seriously obstructed, overheating inside the projector may result in a fire.

9. Do not step on the projector or place any objects upon it. Besides probable physical damage to the projector, doing so may result in accidents and possible injury.
10. Do not place liquids near or on the projector. Liquids spilled into the projector may cause it to fail. If the projector does become wet, disconnect it from the power supply's wall socket and call BenQ to have the projector serviced.

This equipment has a three-pin grounding-type power plug. Do not remove the grounding pin. As a safety feature, this plug will only fit a grounding-type power outlet. If you are unable to fit the plug into the outlet, contact an electrician.

Notice on laser

This symbol indicates that there is a potential hazard of eye exposure to laser radiation unless the instructions are closely followed.

Laser class

(for USA) This Laser Product is designated as Class 3R during all procedures of operation and complies with IEC/EN 60825-1:2007.

(for WW) This Laser Product is designated as Class I during all procedures of operation and complies with IEC/EN 60825-1:2014.

LASER LIGHT - AVOID DIRECT EYE EXPOSURE.

Do not point laser or allow laser light to be directed or reflected toward other people or reflective objects.

Direct or scattered light can be hazardous to eyes and skin.

There is a potential hazard of eye exposure to laser radiation if the included instructions are not followed.

Caution – use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

Laser parameters

Wavelength	449nm - 461nm (Blue)
Mode of operation	Pulsed, due to frame rate
Pulse width	1.34ms
Pulse repetition rate	120Hz
Maximum laser energy	0.698mj
Total internal power	>100w
Apparent source size	>10mm, at lens stop
Divergence	>100 mili Radian

Label instruction

Below drawing show the label's location.

1. Laser warning label

2. Spec label

Laser light instruction

Below drawing is the laser aperture location. Be careful not to let the eye see the light directly.

Interlock switches

This machine has 2 (Top cover x 1, Lens x 1) Interlock switches to protect the laser light Leakage.

1. Will power-off the system individually when the top cover is removed.
2. Will power-off the system individually when the lens is removed or not install correctly.

Prepare for installation

Caution for installation

1. If the projector and lens were purchased separately, remove the anti-dust cap before use and store it for future use. When transporting the projector, move the lens to the home position, remove the lens, and attach the anti-dust cap.

2. When the projector is not in use, attach the lens cover supplied with the projector or the projection lens.

Focus adjustment

The high clarity projection lens is thermally affected by the light from the bulb; thus, the focus is unstable for a short period immediately after the power is turned on. Please wait at least 15 minutes of continuous projection before adjusting the focus.

Cooling notice

Allow at least 50 cm (19.7 inch) for clearance around the exhaust vent. Make sure no objects block air input within 30 cm (11.8 inch).

Keep the outlet at least 1 m away from the inlets of other projectors.

- The projector can be installed at any angle.

- Allow at least 50 cm of clearance around the exhaust vent.

- Ensure that the air intake vents do not recycle hot air from the exhaust vent.
- When operating in an enclosed space, make sure that the surrounding air temperature does not exceed the projector's operating temperature and that the air intake and exhaust vents are unobstructed.
- All enclosures should pass a certified thermal evaluation to ensure that the projector does not recycle exhaust air. Recycling exhaust air may cause the projector to shutdown even if the ambient temperature is within the acceptable operating temperature range.

Package contents

Standard packing items

Lens information

Model	Lens Type	Part Number	Throw Ratio	Lens Shift
LS2ST3	Wide fix	5J.JDH37.002	WUXGA: 0.778	Vertical: -15%-55% Horizontal: -5%-5%

Introduction

Projector exterior view

Front and upper side view

1. Front IR remote sensor
2. FILTER indicator light
3. LIGHT SOURCE indicator light
4. TEMPerature indicator light
5. POWER indicator light
6. Front vent (cool air intake)
7. Front adjuster feet
8. LENS RELEASE button
9. Projection lens
10. Side vent (cool air intake)

Rear and upper side view

11. Rear IR remote sensor
12. Vent (cool air outtake)
13. AC power cord inlet
14. Control terminals
15. Control panel

Controls and functions

Control panel

- **MENU**
Turns on the On-Screen Display (OSD) menu. Goes back to previous OSD menu, exits and saves menu settings. See ["Using the menu" on page 40](#) for details.
- **Keystone/Arrow keys (▶/◀ Left)**
Manually corrects distorted images resulting from an angled projection.
- **SOURCE**
Displays the source selection bar.
- **ENTER**
Selects an available picture setup mode.
Enacts the selected On-Screen Display (OSD) menu item. See ["Using the menu" on page 40](#) for details.
- **Keystone/Arrow keys (▲/▼ Down)**
Manually corrects distorted images resulting from an angled projection.
- **AUTO**
Automatically determines the best picture timings for the displayed image. See ["Auto adjusting the image" on page 38](#) for details.
- **Keystone/Arrow keys (◀/▶ Right)**
Manually corrects distorted images resulting from an angled projection.
- **Power**
Toggles the projector between standby mode and on. See ["Switch on the projector" on page 33](#) and ["Switch off the projector" on page 39](#) for details.
- **Keystone/Arrow keys (▼/▲ Up)**
When the On-Screen Display (OSD) menu is activated, the ▲, ▼, ◀, and ▶ keys are used as directional arrows to select the desired menu items and to make adjustments. See ["Using the menu" on page 40](#) for details.

Control terminal

- **MONITOR OUT**
Connection to other display equipment for concurrent playback display.
- **PC**
15-pin VGA port for connection to RGB, component HD source, or PC.
- **HDBaseT**
Connect an Ethernet cable (Cat5/Cat6) from HDBaseT transmitter with high-definition video (HD), RS232 control and LAN control.
- **DVI-D**
Connection to DVI source.
- **HDMI 1**
Connection to HDMI source.
- **HDMI 2**
Connection to HDMI source.
- **LAN**
For connection to RJ45 Cat5/Cat6 Ethernet cable to control the projector through a network.
- **USB 1.5A**
Support 5V/1.5A output.
- **3D SYNC OUT**
Connection to 3D IR sync signal transmitter.
- **3D SYNC IN**
Connect 3D-sync in cable from a computer or an enabled device.
- **VIDEO**
Connection to a video source.
- **SERVICE**
Maintenance exclusive port for authorized maintenance personnel only.
- **RS-232 IN**
Standard 9-pin D-sub interface for connection to PC control system and projector maintenance.
- **RS-232 OUT**
Connects to another projector (same model) for RS-232 control.
- **PC 2 (R/Pr, G/Y, B/Pb, H, V)**
Connection to RGB or YPbPr/YCbCr output signal with BNC type input terminal.
- **AUDIO IN (L/R)**
Connection to an audio input source via an audio or audio L/R cable.
- **AUDIO OUT (L/R)**
Connection to a speaker or headset.
- **AUDIO IN**
Connection to an audio input source via an audio cable.
- **WIRED REMOTE IN**
Connection to remote control for wire remote control.
- **WIRED REMOTE OUT**
Connection to another projector.
- **12V TRIGGER**
3.5mm mini earphone jack, employs 200mA display relay to provide 12(+/-1.5)V output and short circuit protection.

Caution:

Make sure the port is valid before inserting a wired remote controller. The remote controller may be damaged in case of an invalid port, e.g. a wired remote controller is connected to trigger output. For more information about upgrading firmware via Lan, please contact BenQ service.

Remote control

- **ON / OFF**
Toggles the projector between standby mode and on.
- **KEYSTONE+/KEYSTONE-**
Manually corrects distorted images resulting from an angled projection.
- **VOLUME +/VOLUME -**
Increases/decreases the projector volume.
- **QUICK INSTALL**
Displays the **Quick Install** OSD menu.
- **MUTE**
Toggles projector audio between on and off.
- **Arrow keys (▲ Up, ▼ Down, ◀ Left, ▶ Right)**
When the On-Screen Display (OSD) menu is activated, the arrow keys are used as directional arrows to select the desired menu items and to make adjustments. See ["Using the menu" on page 40](#) for details.
- **ENTER**
Selects an available picture setup mode. Activates the selected On-Screen Display (OSD) menu item.
- **MENU**
Turns on the On-Screen Display (OSD) menu. Goes back to previous OSD menu, exits and saves menu settings.
- **EXIT**
Goes back to previous OSD menu, exits and saves menu settings.
- **INPUT**
Selects an input source for display.
- **PCITURE**
Press to display **Picture** menu.
- **NETWORK**
Selects Network Display as the input signal source.
- **AUTO SYNC**
Automatically determines the best picture timings for the displayed image.
- **ASPECT**
Selects the display aspect ratio.
- **BLANK**
Used to hide the screen picture.

- **OVERSCAN**
Press to select overscan mode.
 - **FREEZE**
Freezes the projected image.
 - **LAMP MODE**
Press to display OSD menu to select desired light mode.
 - **3D MODE**
Press to display 3D setup menu.
 - **INFO.**
Press to display INFORMATION menu.
 - **LIGHT**
Press to open backlight of remote controller.
 - **CLEAR**
Clear remote ID SET assigned to all projectors. Press **CLEAR** and **ID SET** for five seconds. The LED blinks three times then the ID setting is cleared.
 - **SHUTTER**
The function is not available on this projector.
 - **ID SET**
 - Remote control ID SET (set the particular remote code)
Press to set remote ID.
Press **ID SET** for three seconds. The **POWER** indicator on the remote control blinks, then press 01~99 to designate an ID.
-  **Note:**
The remote control number (Remote control ID) must match the Projector ID Setting number for accurate control.
- Clear Remote ID SET (set remote code to all)
Press **CLEAR** and **ID SET** for five seconds. The **POWER** indicator on the remote control blinks a single instance to reset remote code to all, can control projector no matter projector id setting.
 - **Numeric buttons**
Enters numbers in network settings.
Numeric buttons 1, 2, 3, 4 cannot be pressed when asked to enter password.
 - **WIRE REMOTE jack**
Connect to projector for wire remote control.

Connect with projector

When you use a system with multiple projectors, use commercially available M3 stereo mini jack cables to connect the other projectors via the WIRED REMOTE IN/WIRED REMOTE OUT terminals.

The remote control is effective even in places where obstacles stand in the light path or where devices are susceptible to outside light.

Note:

Use two core shielded cables no longer than 15 m (49.2 ft). The remote control may not operate when the length of the cable exceeds 15 m (49.2 ft) or when it is not properly shielded.

Remote control effective range

Infra-Red (IR) remote control sensor is located on the front and rear of the projector. The remote control must be held at an angle within 30 degrees perpendicular to the projector's IR remote control sensor to function correctly. The distance between the remote control and the sensor should not exceed 8 meters (~ 26 feet).

Make sure that there are no obstacles between the remote control and the IR sensor on the projector that might obstruct the infra-red beam.

Replacing the remote control battery

1. To open the battery cover, turn the remote control over to view its back, push on the finger grip on the cover and slide it up in the direction of the arrow as illustrated. The cover will slide off.
2. Remove any existing batteries (if necessary) and install two AA batteries observing the battery polarities as indicated in the base of the battery compartment. Positive (+) goes to positive and negative (-) goes to negative.
3. Refit the cover by aligning it with the base and sliding it back down into position. Stop when it clicks into place.

Caution:

- Avoid excessive heat and humidity.
- There may be battery damage if the battery is incorrectly replaced.
- Replace only with the same or equivalent type recommended by the battery manufacturer.
- Dispose of the used battery according to the battery manufacturer's instructions.
- Never throw a battery into a fire. There may be danger of an explosion.
- If the battery is dead or if you will not be using the remote control for a long time, remove the battery to prevent damage to the remote control from possible battery leakage.

Installation

Caution:

To avoid damaging the DLP chips, never aim a high-power laser beam into the projection lens.

Installing removing the optional lens

Caution:

- Do not shake or place excessive pressure on the projector or the lens components as the projector and lens components contain precision parts.
- Before removing or installing the lens, be sure to turn off the projector, wait until the cooling fans stop, and turn off the main power switch.
- Do not touch the lens surface when removing or installing the lens.
- Keep fingerprints, dust or oil off the lens surface. Do not scratch the lens surface.
- Work on a level surface with a soft cloth under it to avoid scratching.
- If you remove and store the lens, attach the lens cap to the projector to keep off dust and dirt.

Installing the new lens

Remove both end caps from the lens.

Note:

Removal of the plastic body cap before inserting a lens for the first time.

1. Orient the lens so that the arrow on the label pasted on its side is facing upward and push the lens into the lens mount of the unit as far as it will go.

2. Rotate the lens clockwise until you feel it click into place.

Removing the existing lens from the projector

1. Push the LENSE RELEASE button to the unlock position.

2. Grasp the lens.
3. Rotate the lens counterclockwise. The existing lens will be disengaged.

4. Pull out the existing lens slowly.

Evaluate for distance by image size

Obtaining a preferred projected image size

The distance from the projector lens to the screen, the zoom setting (if available), and the video format each factors in the projected image size.

Projection dimensions

Refer to "[Dimensions](#)" on page 72 for the center of lens dimensions of this projector before calculating the appropriate position.

LU9245

The screen aspect ratio is 16:10 and the projected picture is 16:10.

Note:

To optimize the projection quality, we suggest to project images in an area without grayscale.

Lens										Wide Zoom (LS2ST1)				Standard (LS2SD2)

 **Note:**

There is 5% tolerance among these numbers due to optical component variations. BenQ recommends that if you intend to permanently install the projector, you should physically test the projection size and distance using the actual projector before you permanently install it, so as to make allowance for this projector's optical characteristics. This will help you determine the exact mounting position so that it best suits your installation location.

Adjusting by Lens shift

The Lens Shift function can be used to adjust the position of the projected image either horizontally or vertically within the range detailed below.

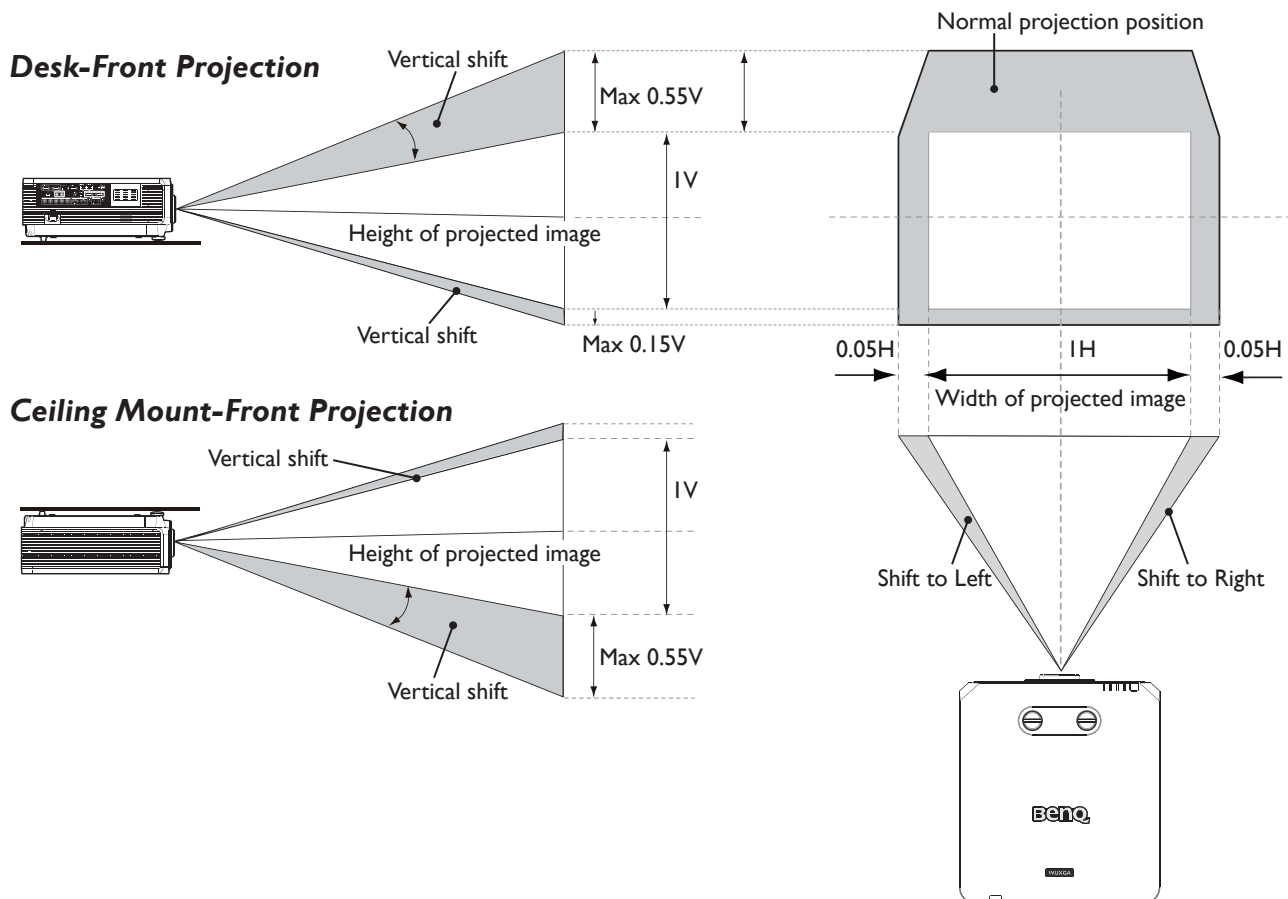

Adjusting the vertical image position

The vertical image height can be adjusted between 55% and -15% for WUXGA of offset position. Please consult the Lens Shift Range diagram below for further clarification.

Adjusting the horizontal image position

With the lens in the center position the horizontal image position can be adjusted to the left or right by up to a maximum of 5% of the image width. Please consult the Lens Shift Range diagram below for further clarification.

Lens shift range diagram

Notice (when edge blending)

- To avoid the image shaking or some pixels in the display may be misaligned, do not use the projector in the following location:
 - In a building close to a construction site.
 - In a room where an air conditioner unit is working and it vibrates.
 - In a place where the temperature changes dramatically that may cause thermal contraction.
- Before making any adjustment, leave the projector lit for at least 45 minutes after its light source is turned on. This allows the internal temperature of the projector to stabilize.

Adjusting the Zoom/Focus

You may turn the zoom ring to zoom in or out. To focus the image, rotate the focus ring until the image is clear. The projector will focus at distances. See page 23.

Connection

Before connecting

- Before connecting, carefully read the operating instructions for connecting the external device
- Turn off the power to all devices before connecting cables.
- Take note of the following before connecting cables. Failure to do so may result in malfunctions.
 - Before connecting a cable to the projector or to a device that is connected to the projector, touch any nearby metallic objects to remove any static electricity from your body.
 - Do not use unnecessarily long cables to connect the projector or a device to the projector. Using a longer cable that is wound makes it act like an antenna, making it more susceptible to noise.
 - When connecting cables, connect GND first and then insert the connecting terminal of the connecting device.
- Acquire any connection cables necessary to connect external devices to the system that are not supplied.
- The images on the screen may wobble if the video signal contains too much jitter. In this case, a time base corrector (TBC) must be connected.
- If synchronization signal outputs from computers or video equipment are disrupted due to changes in the video output settings or any other reasons, the colors of projected images may be temporarily disrupted.
- The projector accepts video signals, Y/C signals, YCBCR/YPBPR signals, analog RGB signals (synchronization signals are TTL level), and digital signals.
- Some computer models are not compatible with the projector.
- Use a cable compensator when you connect devices to the projector with long cables. If a cable compensator is not used, the image may not display properly.

Operations

Switch on/off the projector

Connecting the power cord

Plug the power cord into the projector and into a wall socket. Turn on the wall socket switch (where fitted). Check that the POWER indicator light on the projector lights orange after power has been applied.

Caution:

Please use the original accessories (e.g. power cable) only with the device to avoid possible dangers such as electric shock and fire.

Power indicator

Power	Temp	Light	Filter	Status & Description
Orange	-	-	-	Stand-by
Green Flashing	-	-	-	Powering up
Green	-	-	-	Normal operation
Orange Flashing	-	-	-	Normal power down cooling

Switch on the projector

Press **POWER** on the projector or **ON** on the remote control to start the projector and a start up tone sounds. The **POWER** indicator light flashes green and stays green when the projector is on.

The start up procedure takes about 30 seconds. In the later stage of start up, a startup logo is projected.

(If necessary) Rotate the focus ring to adjust the image clearness.

Select language

To use the OSD menus, please set them to your familiar language first.

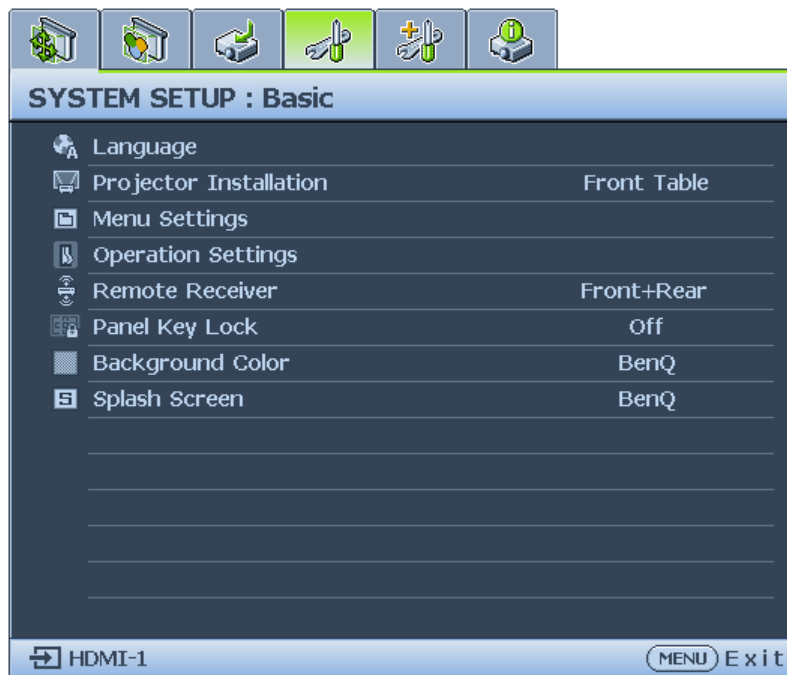

Please Select Language			
English	한국어	Hrvatski	हिन्दी
Français	Svenska	Română	
Deutsch	Nederlands	Norsk	
Italiano	Türkçe	Dansk	
Español	Čeština	Български	
Русский	Português	suomi	
繁體中文	ไทย	Indonesian	
简体中文	Polski	Ελληνικά	
日本語	Magyar	العربية	
Press Enter to confirm, Exit to leave			

*After this process is done, this menu will not show up again after 1st time adjustment unless user presses **Reset All Settings**.

1. Press **ENTER** on the projector or remote control to turn the OSD menu on.

2. Use ◀/▶ to highlight the **System Setup: Basic** menu.

3. Press ▼ to highlight **Language** and press **ENTER** to select a preferred language.

4. Press **ENTER** twice* on the projector or remote control to leave and save the settings.
 *The first press leads you back to the main menu and the second press closes the OSD menu.

Using the OSD

Choosing a location

Your projector is designed to be installed in one of four possible installation locations:

1. Front Table

Select this location with the projector placed on a table in front of the screen. This is the most common way to position the projector for quick setup and portability.

2. Rear Table

Select this location with the projector placed on a table behind the screen. Note that a special rear projection screen is required.

*Set **Rear Table** in the **SYSTEM SETUP: Basic > Projector Installation** menu after you turn the projector on.

3. Front Ceiling

Select this location with the projector suspended upside-down from the ceiling in front of the screen.

Purchase the BenQ Projector Ceiling Mounting Kit from your dealer to mount your projector on the ceiling.

*Set **Front Ceiling** in the **SYSTEM SETUP: Basic > Projector Installation** menu after you turn the projector on.

4. Rear Ceiling

Select this location with the projector suspended upside-down from the ceiling behind the screen.

Note that a special rear projection screen and the BenQ Projector Ceiling Mounting Kit are required for this installation location.

*Set **Rear Ceiling** in the **SYSTEM SETUP: Basic > Projector Installation** menu after you turn the projector on.

Your room layout or personal preference will dictate which installation location you select. Take into consideration the size and position of your screen, the location of a suitable power outlet, as well as the location and distance between the projector and the rest of your equipment.

Using test pattern

The projector is capable of displaying the grid test pattern. It can be used to assist you with the adjustment of image size and focus, ensuring that the projected image is free from distortion. To display the test pattern, open the OSD menu and go to the **System Setup: Advanced > Test Pattern** and press ◀/▶ to select On.

Adjusting by corner fit

Manually adjust four corners of the image by setting the horizontal and vertical values. Using the OSD menu

1. Press **MENU** and then press ◀/▶ until the **Display** menu is highlighted.
2. Press ▼ to highlight **Corner Fit** and press **ENTER**. The **Corner Fit** page displays.

3. Press ▲/▼/◀/▶ to select one of the four corners and press **ENTER**.

4. Press ▲/▼ to adjust vertical values from 0 to 60.

5. Press ◀/▶ to adjust horizontal values from 0 to 60.

Auto adjusting the image

In some cases, you may need to optimize the picture quality. To do this, press **AUTO** on the projector or remote control. Within 3 seconds, the built-in Intelligent Auto Adjustment function will re-adjust the values of Frequency and Clock to provide the best picture quality.

The current source information will be displayed in the upper left corner of the screen for 3 seconds.

Note:

- The screen will be blank while AUTO is functioning.
- This function is only available when PC signal (analog RGB) is selected.

Fine turning the image size and clarity

1. Adjust the projected image to the size that you need using the ZOOM ring.
2. Sharpen the image by rotating the FOCUS ring.

Switch off the projector

1. Press **POWER** or **OFF** and a confirmation message will appear prompting you. If you don't respond in a few seconds, the message will disappear.
2. Press **POWER** or **OFF** a second time. The **POWER** indicator light flashes orange, the projection light source shuts down.

3. Once the cooling process finishes, a "**Power Off Ring Tone**" will be heard. The **POWER** indicator light is a steady orange and fans stop. Disconnect the power cord from the power outlet.

Caution:

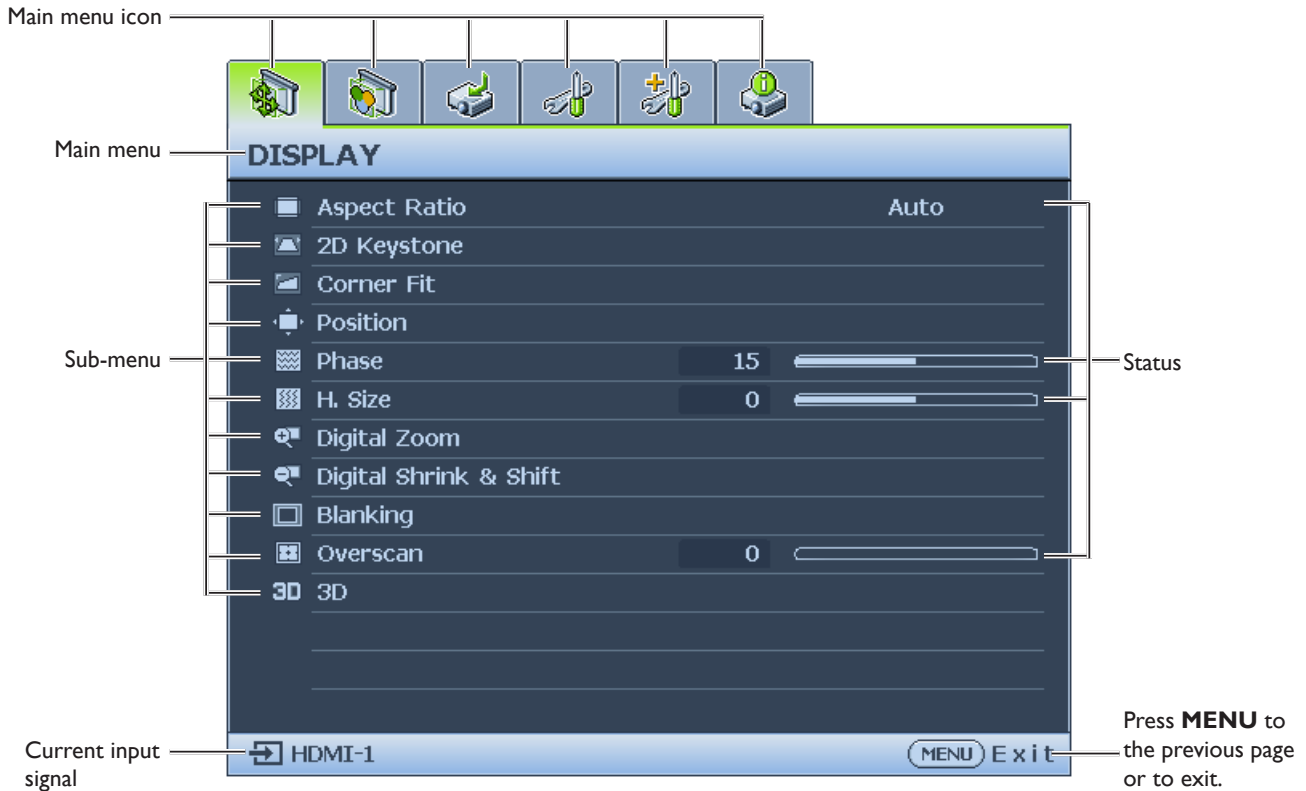

- To protect the light source, the projector will not respond to any commands during the cooling process.
- Press **POWER** or **ON** again to start the projector after the **POWER** indicator light turns orange.

Using the menu

Main menu

The projector is equipped with On-Screen Display (OSD) menus for making various adjustments and settings.

Below is the overview of the OSD menu.

1. Display menu (see ["Display menu" on page 41](#))
2. Picture menu (see ["Picture menu" on page 45](#))
3. Source menu (see ["Source menu" on page 49](#))
4. System Setup : Basic menu (see ["System Setup : Basic menu" on page 50](#))
5. System Setup : Advanced menu (see ["System Setup : Advanced menu" on page 53](#))
6. Information menu (see ["Information menu" on page 58](#))

Available menu items may vary depending on the connected video sources or specified settings. Menu items that are not available will become grayed out.

- Use the arrow keys (**▲/▼/◀/▶**) on the projector or remote control to move through the menu items.
- Use **ENTER** to confirm the selected menu item.

Display menu

- **Aspect Ratio**

Press ◀/▶ to adjust the aspect of the projected image. The options are Auto, Real, 4:3, 16:9 and 16:10.

- Using the remote control

1. Press **ASPECT** to show the current setting.
2. Press **ASPECT** repeatedly to select an aspect ratio to suit the format of the video signal and your display requirements.

1. **Auto:** Scales an image proportionally to fit the projector's native resolution in its horizontal width. This is suitable for the incoming image which is neither in 4:3 nor 16:9 and you want to make most use of the screen without altering the image's aspect ratio.

2. **Real:** The image is projected as its original resolution, and resized to fit within the display area. For input signals with lower resolutions, the projected image will display smaller than if resized to full screen. You could adjust the zoom setting or move the projector away from the screen to increase the image size if necessary. You may also need to refocus the projector after making these adjustments.

3. **4:3:** Scales an image so that it is displayed in the center of the screen with a 4:3 aspect ratio. This is most suitable for 4:3 images like computer monitors, standard definition TV and 4:3 images aspect DVD movies, as it displays them without aspect alteration.

4. **16:9**: Scales an image so that it is displayed in the center of the screen with a 16:9 aspect ratio. This is most suitable for images which are already in a 16:9 aspect, like high definition TV, as it displays them without aspect alteration.
5. **16:10**: Scales an image so that it is displayed in the center of the screen with a 16:10 aspect ratio. This is most suitable for images which are already in a 16:10 aspect, as it displays them without aspect alteration.

6. **2.35:1**: Scales an image so that it is displayed in the center of the screen with a 2.35:1 aspect ratio. This is most suitable for widescreen cinemascope formats for movie theaters or images which already vary from a 2.35 to 2.40 aspect, as it displays them without aspect alteration.

- **2D Keystone**
Press **ENTER** and press ▲/▼/◀/▶ to adjust horizontal or vertical distortion brought by the projection angle.
- **Corner Fit**
Press **ENTER** to enter the **Corner Fit** menu. See "[Corner Fit menu](#)" on page 43 for more details.
- **Position**
Press **ENTER** and press ▲/▼/◀/▶ to adjust the position of the projected picture.
- **Phase**
Press ◀/▶ to adjust Phase for the projected picture.
- **H. Size**
Press ◀/▶ to adjust H. Size for the projected picture.
- **Digital Zoom**
Press ◀/▶ to enlarge the projected image.
- **Digital Shrink & Shift**
Press **ENTER** to enter the **Digital Shrink & Shift** menu. See "[Digital Shrink & Shift menu](#)" on page 43 for more details.
- **Blanking**
Press **ENTER** to enter the **Blanking** menu. See "[Blanking menu](#)" on page 44 for more details.
- **Overscan**
Press ◀/▶ to hide edge of the projected image to damage the noise appear.
- **3D**
Press **ENTER** to enter the **3D** menu. See "[3D menu](#)" on page 44 for more details.

Corner Fit menu

- **Top Left**
Press **ENTER** and press ▲/▼/◀/▶ to correct the top left corner.
- **Top Right**
Press **ENTER** and press ▲/▼/◀/▶ to correct the top right corner.
- **Bottom Left**
Press **ENTER** and press ▲/▼/◀/▶ to correct the bottom left corner.
- **Bottom Right**
Press **ENTER** and press ▲/▼/◀/▶ to correct the bottom right corner.

Digital Shrink & Shift menu

- **Digital Shrink**
Press **ENTER** and press ◀/▶ to reduce the image to a desired size. Press **AUTO SYNC** to restore the picture to its original size.
- **Digital Image Shift**
Press **ENTER** and press ▲/▼/◀/▶ to shift the image. Press **AUTO SYNC** to restore the picture to its original position.

Blanking menu

- **Top**
Press ◀/▶ to adjust the top blanking area on the projected picture.
- **Bottom**
Press ◀/▶ to adjust the bottom blanking area on the projected picture.
- **Left**
Press ◀/▶ to adjust the left blanking area on the projected picture.
- **Right**
Press ◀/▶ to adjust the right blanking area on the projected picture.
- **Reset**
Press **ENTER** to set up all Blanking settings to default.

3D menu

- **3D Sync Mode**
Press ◀/▶ to select the 3D sync mode. The options are DLP Link and VESA 3D.
- **3D Mode**
Press **ENTER** to enter the **3D Mode** menu. Press ▲/▼ to select the 3D format. The options are Auto, Top-Bottom, Frame Sequential, Frame Packing, Side-By-Side and Off.
- **3D Sync Invert**
Press ◀/▶ to enable or disable 3D Sync Invert.
- **3D Sync Out Delay**
Press ◀/▶ to adjust 3D sync out signal delay.
- **3D Sync Out Reference**
Press ◀/▶ to select the 3D sync out behavior. The options are 3D VESA and Bypass to another projector.
- **Save 3D Settings**
Press **ENTER** to enter the **Save 3D Settings** menu. Press ▲/▼ and **ENTER** to save the current 3D settings.
- **Apply 3D Settings**
Press **ENTER** to enter the **Apply 3D Settings** menu. Press ▲/▼ and **ENTER** to apply the saved 3D settings.

Picture menu

- **Picture Mode**

Press ◀/▶ to select a picture mode. The options are Bright, Presentation, sRGB, Cinema, DICOM SIM, 3D, User 1 and User 2.

- **Bright mode:** Maximizes the brightness of the projected image. This mode is suitable for environments where extra-high brightness is required, such as using the projector in well lit rooms.
 - **Presentation mode:** Is designed for presentation. The brightness is emphasized in this mode to match PC and notebook coloring.
 - **sRGB mode:** Maximizes the purity of RGB colors to provide true-to-life images regardless of brightness setting. It is most suitable for viewing photos taken with an sRGB compatible and properly calibrated camera, and for viewing PC graphic and drawing applications such as AutoCAD.
 - **Vivid mode:** Is appropriate for playing colorful movies, video clips from digital cameras or DVs through the PC input for best viewing in a blackened (dimly lit) environment.
 - **Cinema mode:** Is appropriate for playing colorful movies, video clips from digital cameras or DVs through the PC input for best viewing in a blackened (dimly lit) environment.
 - **DICOM SIM:** This display mode simulates the grayscale/gamma performance of equipment used for “Digital Imaging and Communications in Medicine” (DICOM).
Important: This mode should NEVER be used for medical diagnosis, it is for education/training purposes only.
 - **3D mode:** Is appropriate for playing 3D images and 3D video clips.
 - **HDR10 mode:** Only available when detecting HDR10 content, other picture mode can't be selected
 - **HLG mode:** Only available when detecting HLG content, other picture mode can't be selected
 - **User 1/User 2 mode:** Recalls the settings customized based on the current available picture modes.
 - **Reference Mode**
- Press ◀/▶ to select a reference mode. The options are Bright, Presentation, sRGB, Cinema, Vivid and DICOM SIM.

- **Brightness**

Press ◀/▶ to adjust the brightness of the projected image.

The higher the value, the brighter the image. And lower the setting, darker the image. Adjust this control so the black areas of the image appear just as black and that detail in the dark areas is visible.

- **Contrast**

Press ◀/▶ to adjust the contrast of the projected image.

The higher the value, the greater the contrast. Use this to set the peak white level after you have previously adjusted the Brightness setting to suit your selected input and viewing environment.

- **Color**

Press ◀/▶ to adjust the color saturation.

Lower setting produces less saturated colors. If the setting is too high, colors on the image will be overpowering, which makes the image unrealistic.

- **Tint**

Press ◀/▶ to adjust the tint of the projected image.

The higher the value, the more reddish the picture becomes. The lower the value, the more greenish the picture becomes.

- **Sharpness**

Press ◀/▶ to adjust the display sharpness of the projected image.

The higher the value, the sharper the picture becomes. The lower the value, the softer the picture becomes.

- **Brilliant Color**

Press ◀/▶ to adjust the brilliant color of the projected image.

This feature utilizes a new color-processing algorithm and system level enhancements to enable higher brightness while providing truer, more vibrant colors in picture. It enables a greater than 50% brightness increase in mid-tone images, which are common in video and natural scenes, so the projector reproduces images in realistic and true colors. If you prefer images with that quality, select **On**. If you don't need it, select **Off**.

When **Off** is selected, the **Color Temperature** function is not available.

- **Gamma Selection**

Press ◀/▶ to select the relationship between input source and picture brightness.

- **HDR Brightness**

Press ◀/▶ to adjust the HDR brightness.

- **Color Temperature**

Press ◀/▶ to adjust the color temperature. The options are Cool, Normal and Warm.

- **Cool:** makes the image appear bluish white.
- **Normal:** Maintains normal colorings for white.
- **Warm:** Makes images appear reddish white.

- **Color Temperature Fine Tuning**

Press **ENTER** to enter the **Color Temperature Fine Tuning** menu. See "[Color Temperature Fine Tuning menu](#)" on page 47 for more details.

- **3D Color Management**

Press **ENTER** to enter the **3D Color Management** menu. See "[3D Color Management menu](#)" on page 48 for more details.

- **Reset Picture Settings**

Press **ENTER** to enter the **Reset Picture Settings** menu. Press **▲/▼** and press **ENTER** to set to the default value.

- **Current:** Returns current picture mode to the factory preset settings.
- **All:** Returns all settings, except User 1/User 2 in the Picture menu to the factory preset settings.

Color Temperature Fine Tuning menu

- **R Gain**
Press **◀/▶** to adjust the Red Gain.
- **G Gain**
Press **◀/▶** to adjust the Green Gain.
- **B Gain**
Press **◀/▶** to adjust the Blue Gain.
- **R Offset**
Press **◀/▶** to adjust the Red Offset.
- **G Offset**
Press **◀/▶** to adjust the Green Offset.
- **B Offset**
Press **◀/▶** to adjust the Blue Offset.

To set a preferred color temperature:

1. Highlight **Color Temperature** and select **Warm**, **Normal** or **Cool** by pressing **◀/▶** on the projector or remote control.
2. Press **▼** to highlight **Color Temperature Fine Tuning** and press **ENTER**. The Color Temperature Fine Tuning page appears.
3. Press **▲/▼** to highlight the item you want to change and adjust the values by pressing **◀/▶**.
 - **R Gain/G Gain/B Gain:** Adjusts the contrast levels of Red, Green, and Blue.
 - **R Offset/G Offset/B Offset:** Adjusts the brightness levels of Red, Green, and Blue.
4. Press **MENU** to exit and save the settings.

3D Color Management menu

- **Primary Color**
Press **ENTER** to enter the **Primary Color** menu. Press **▲/▼** to select the primary color. The options are R, G, B, C, M and Y.
- **Hue**
Press **ENTER** to enter the **Hue** menu. Press **▲/▼/◀/▶** to adjust settings.
- **Saturation**
Press **ENTER** to enter the **Saturation** menu. Press **▲/▼/◀/▶** to adjust settings.
- **Gain**
Press **ENTER** to enter the **Gain** menu. Press **▲/▼/◀/▶** to adjust settings.

3D Color Management

In most installation situations, color management will not be necessary, such as in classroom, meeting room, or lounge room situations where lights remain on, or where building external windows allow daylight into the room.

Only in permanent installations with controlled lighting levels such as boardrooms, lecture theaters, or home theaters, should color management be considered. Color management provides fine color control adjustment to allow for more accurate color reproduction, should you require it.

Proper color management can only be achieved under controlled and reproducible viewing conditions. You will need to use a colorimeter (color light meter), and provide a set of suitable source images to measure color reproduction. These tools are not provided with the projector, however, your projector supplier should be able to provide you with suitable guidance, or even an experienced professional installer.

The Color Management provides six sets (RGBCMY) of colors to be adjusted. When you select each color, you can independently adjust its range and saturation according to your preference.

If you have purchased a test disc which contains various color test patterns and can be used to test the color presentation on monitors, TVs, projectors, etc. You can project any image from the disc on the screen and enter the 3D Color Management menu to make adjustments.

To adjust the settings:

1. Go to the **Picture** menu and highlight **3D Color Management**.
2. Press **ENTER** and the 3D Color Management page displays.
3. Highlight **Primary color** and press **◀/▶** to select a color from among Red, Green, Blue, Cyan, Magenta and Yellow.

4. Press ▼ to highlight **Hue** and press ◀/▶ to select its range. Increase in the range will include colors consisted of more proportions of its two adjacent colors.
Please refer to the illustration to the right for how the colors relate to each other.
For example, if you select Red and set its range at 0, only pure red in the projected picture will be selected. Increasing its range will include red close to yellow and red close to magenta.
5. Press ▼ to highlight **Saturation** and adjust its values to your preference by press ◀/▶.
Every adjustment made will reflect to the image immediately.
For example, if you select Red and set its value at 0, only the saturation of pure red will be affected.

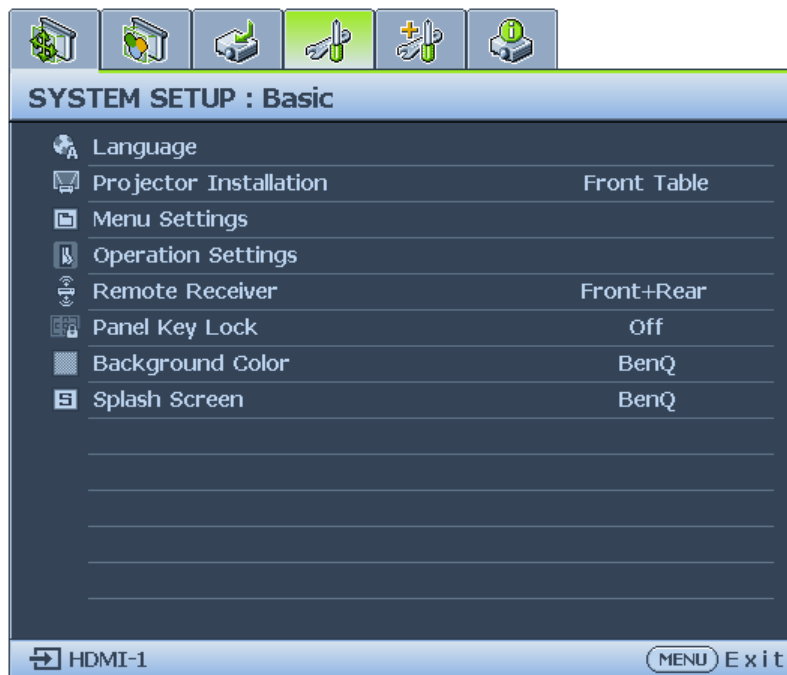

Source menu

- **Quick Auto Search**
Press ◀/▶ to enable or disable search the input source automatically.
- **HDMI Format**
Press ◀/▶ to selects a suitable color format to to optimize display quality. The options are Auto, RGB Limited, RGB Full, YUV Limited and YUV Full.
 - **Auto:** Automatically selects a suitable color space and gray level for the incoming HDMI signal.
 - **RGB Limited:** Utilizes the Limited range RGB 16-235.
 - **RGB Full:** Utilizes the Full range RGB 0-255.
 - **YUV Limited:** Utilizes the Limited range YUV 16-235.
 - **YUV Full:** Utilizes the Full range YUV 0-255.
- **HDMI EDID**
Press **ENTER** to enter the **HDMI EDID** menu. Press ▲/▼ and press **ENTER** to select the HDMI. Press ◀/▶ to set to the default value.
 - **Enhance:** Enhanced mode can switch to HDMI 2.0 EDID.
 - **Standard:** Standard mode can switch to HDMI 1.4 EDID.

- **HDBaseT EDID**
Press ◀/▶ to switch HDBaseT EDID between HDMI 1.4 or HDMI 2.0 in order to solve compatibility issue with uncertain old players.
 - **Enhance:** Enhanced mode can switch to HDMI 2.0 EDID.
 - **Standard:** Standard mode can switch to HDMI 1.4 EDID.
- **HDMI Equalizer**
Press **ENTER** to enter the **HDMI Equalizer** menu. Press ▲/▼ and press **ENTER** to select the HDMI. Press ◀/▶ to set to the default value.
- **Auto Sync**
Press ◀/▶ to enable or disable auto sync function.

System Setup : Basic menu

- **Language**
Press **ENTER** to enter the **Language** menu. Press ▲/▼/◀/▶ to select the language of OSD menu.
- **Projector Installation**
Press ◀/▶ to select the projector installation. The options are Front Table, Rear Table, Rear Ceiling and Front Ceiling.
- **Menu Settings**
Press **ENTER** to enter the **Menu Settings** menu. See "[Menu Settings menu](#)" on page 51 for more details.
- **Operation Settings**
Press **ENTER** to enter the **Operation Settings** menu. See "[Operation Settings menu](#)" on page 51 for more details.
- **Remote Receiver**
Press ◀/▶ to select the remote receiver. The options are Front, Rear and Front+Rear.
- **Panel Key Lock**
Press ◀/▶ to enable or disable all panel key functions except **POWER** on the projector.

- **Background Color**
Press ◀/▶ to select the background color when no input signal. The options are BenQ, Black, Blue and Purple.
- **Splash Screen**
Press ◀/▶ to select the start up pattern when the projector turns on. The options are BenQ, Black and Blue.

- **Direct Power On**
Press ◀/▶ to enable or disable automatically turning on the projector when the AC power is connected.
- **Signal Power On**
Press ◀/▶ to enable or disable automatically turning on the projector when an input signal is detected.
- **Auto Power Off**
Press ◀/▶ to enable or disable automatically turning off the projector when there is no input signal.

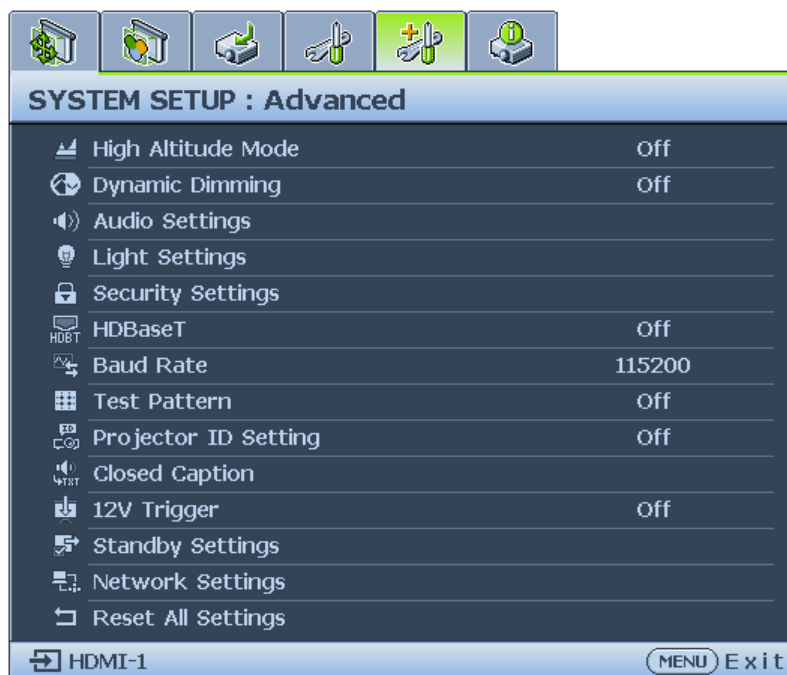

- **Blank Timer**
Press ◀/▶ to set the length of time the image is blanked. The options are Disable, 5 mins, 10 mins, 15 mins, 20 mins, 25 mins and 30 mins.
- **Sleep Timer**
Press ◀/▶ to set the length of time before the projector is turned off. The options are Disable, 30 mins, 1 hr, 2 hrs, 3 hrs, 4 hrs, 8 hrs and 12 hrs.
- **Filter Settings**
Press **ENTER** to enter the **Filter Settings** menu. See "[Filter Settings menu](#)" on page 52 for more details.

Filter Settings menu

- **Filter Timer**
Press ◀/▶ to enable or disable filter timer.
- **Reset Filter Timer**
Press **ENTER** to reset the filter timer when the filter is replaced.
- **Filter Usage Time**
Displays the current number of hours the filter has been used.

System Setup :Advanced menu

- High Altitude Mode**
 Press ◀/▶ to enable or disable High Altitude Mode. Enable this function when the operating altitude is higher than 1500m or the ambient temperature is over 40°C.
- Dynamic Dimming**
 Press ◀/▶ to enable or disable dynamic dimming function. Enable the function to automatically reduces the screen's brightness level when the displayed image contains a high proportion of bright areas.
 When **3D Sync Mode** is **DLP Link**, the **Dynamic Dimming** function is not available.
- Audio Settings**
 Press **ENTER** to enter the **Audio Settings** menu. See "[Audio Settings menu](#)" on page 55 for more details.
- Light Settings**
 Press **ENTER** to enter the **Light Settings** menu. See "[Light Settings menu](#)" on page 56 for more details.
- Security Settings**
 Press **ENTER** to enter the **Security Settings** menu. See "[Security Settings menu](#)" on page 56 for more details.
- HDBaseT**
 Press ◀/▶ to enable or disable the HDBaseT.

Note:

Turn on HDBaseT mode will disable internal LAN and RS232 control and switch to Normal power standby mode automatically.

HDBaseT control function table

○: Enable X: Disable

- **Baud Rate**

Press ◀/▶ to select RS-232 baud rate. The options are 2400, 4800, 9600, 14400, 19200, 38400, 57600 and 1152000.

- **Test Pattern**

Press ◀/▶ to select the test pattern. The options are Off, Grid, White, Red, Green, Blue, Black, RGB Ramps, Color Bar, Step Bars, CheckBoard, Horizontal Lines, Vertical Lines, Diagonal Lines, Horizontal Ramp and Vertical Ramps.

- **Projector ID Setting**

Press ◀/▶ to enable or disable the projector ID.

- **Closed Caption**

Press **ENTER** to enter the **Closed Caption** menu. See "[Closed Caption menu](#)" on page 57 for more details.

- **I2 Trigger**

Press ◀/▶ to enable or disable I2V trigger function.

- **Standby Settings**

Press **ENTER** to enter the **Standby Settings** menu. See "[Standby Settings menu](#)" on page 57 for more details.

- **Network Settings**

Press **ENTER** to enter the **Network Settings** menu. See "[Network Settings menu](#)" on page 58 for more details.

- **Reset All Settings**

Press **ENTER** to reset all settings to default value.

Audio Settings menu

- **Mute**

Press ◀/▶ to enable or disable the mute function.

- Using the remote control

Press **MUTE** to temporarily turn off the sound. While the sound is off, the screen will display in the upper right corner of the screen.

To restore the sound, press **MUTE** again.

- Using the OSD menu

1. Press **MENU** and then press ◀/▶ until the **System Setup: Advanced** menu is highlighted.
2. Press ▼ to highlight **Audio Settings** and press **ENTER**. The Audio Settings page displays.
3. Highlight **Mute** and press ◀/▶ to select **On**.
4. To restore the sound, repeat steps 1-3 and press ◀/▶ to select **Off**.

- **Volume**

Press ◀/▶ to adjust the volume of the projector.

- Using the remote control

Press **VOLUME+/VOLUME-** to select a desired sound level.

- Using the OSD menu

1. Press **MENU** and then press ◀/▶ until the **System Setup: Advanced** menu is highlighted.
2. Press ▼ to highlight **Audio Settings** and press **ENTER**. The Audio Settings page displays.
3. Press ▼ to highlight **Volume** and press ◀/▶ to select a desired sound level.

- **Built-in speaker**

Press ◀/▶ to enable or disable the built-in speaker.

Light Settings menu

- **Light Mode**
Press ◀/▶ to select the light mode. The options are Normal, Economic, Dimming and Custom.
- **Custom Brightness**
Press ◀/▶ to adjust the brightness of the projector.
- **Light Usage Time**
Press **ENTER** to enter the **Light Source Information** menu.

Security Settings menu

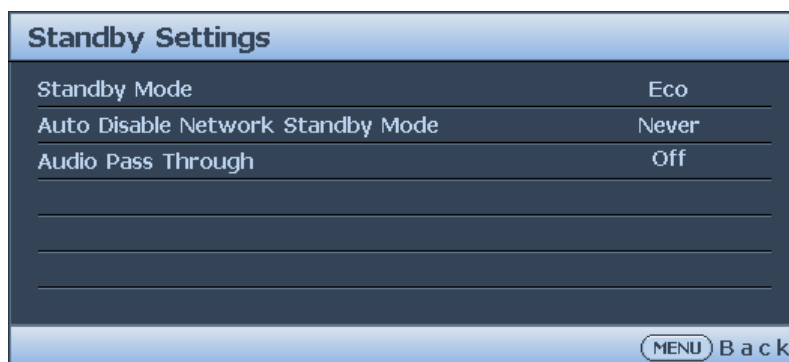

- **Change Password**
Press **ENTER** to change the password.
- **Change Security Settings**
Press **ENTER** to change the security settings.
- **Power On Lock**
Press ◀/▶ to enable or disable the power on lock function. If the function is enabled, you must enter the password every time the projector is turned on.

Closed Caption menu

- **Closed Caption Enable**
Press ◀/▶ to enable or disable the closed caption function.
- **Caption Version**
Press ◀/▶ to select the closed captioning mode. The options are CC1, CC2, CC3 and CC4.

Standby Settings menu

- **Standby Mode**
Press ◀/▶ to select the standby mode. The options are Eco, Network and Normal.
- **Auto Disable Network Standby Mode**
Press ◀/▶ to enable or disable the auto switch from network standby mode to non-network standby mode after a period of time.
- **Audio Pass Through**
Press ◀/▶ to enable the audio line-out function when the projector is in standby mode. The options are Audio In, Audio L/R, HDMI 1, HDMI 2 and Off.

Network Settings menu

- **Wired LAN**
Press **ENTER** to enter the **Wired LAN** menu to setup the IP address, subnet mask, default gateway, DNS server and DHCP.
- **AMX Device Discovery**
Press **◀/▶** to enable or disable the AMX device discovery function. When the function is enabled, the projector can be detected by an AMX controller.
- **Mac Address**
Displays the current MAC address of the projector.

Information menu

- **Source**
Displays the current signal source.
- **Picture Mode**
Displays the current picture mode.
- **Light Mode**
Displays the current light mode.
- **Resolution**
Displays the native resolution of the input source.

- **HDBaseT**
Displays the current HDBaseT status.
- **3D Format**
Displays the current 3D mode. Only available when 3D Mode is enabled.
- **Color System**
Displays the input system format.
- **Light Usage Time**
Displays the number of hours the light has been used.
- **Projector ID**
Displays the current projector ID.
- **Firmware Version**
Displays the firmware version of your projector.
- **Service Code**
Displays the serial number of your projector.

Maintenance

Before maintaining the projector

- Make sure to turn off the power before maintaining the projector.
- When switching off the projector, make sure to follow the procedures in "[Switch off the projector](#)" on page 39.

Care of the projector

Your projector needs little maintenance. The only thing you need to do on a regular basis is to keep the lens clean.

Never remove any parts of the projector. Contact your dealer if other parts need replacing.

Clean the lens front surface

Clean the lens whenever you notice dirt or dust on the surface.

- Use a canister of compressed air to remove dust.
- If there is dirt or smears, use lens-cleaning paper or moisten a soft cloth with lens cleaner and gently wipe the lens surface.

Caution:

Never use any type of abrasive pad, alkaline/acid cleaner, scouring powder, or volatile solvent, such as alcohol, benzene, thinner or insecticide. Using such materials or maintaining prolonged contact with rubber or vinyl materials may result in damage to the projector surface and cabinet material.

Clean the projector case

Before you clean the case, turn the projector off using the proper shutdown procedure as described in "[Switch off the projector](#)" on page 39 and unplug the power cord.

- To remove dirt or dust, wipe the case with a soft, lint-free cloth.
- To remove stubborn dirt or stains, moisten a soft cloth with water and a neutral pH detergent. Then wipe the case.

Caution:

Never use wax, alcohol, benzene, thinner or other chemical detergents. These can damage the case.

Filter maintenance

Cleaning the filter

The air filter prevents dust from accumulating on the surface of the optical elements inside the projector. If the filter is dirty or clogged, your projector may overheat or degrading the projected image quality.

1. Turn off the projector, and unplug the AC power cord from the AC outlet.
2. Cleaning the filter with a vacuum cleaner.

Caution:

Recommend avoiding dusty or smoky environments when you operate the projector; it may cause poor image quality. If the filter is heavily clogged and unable to clean, replace a new filter.

Note:

Using a ladder is recommended to access the filter. Do not remove the projector from the wall mount.

Replacing the side filter

1. Turn off the projector and unplug the power cord from the outlet. Remove any dust on the projector and around the air vents. Loosen the two captive screws that secure the filter cover.

2. Flip up the filter cover.

3. Remove the filter module from the projector.

4. Align the holes on the new filter module with the captive screws on the filter cover.

5. Replace the filter cover onto the projector by pushing gently in the direction shown and tighten the screws.

Replacing the front filter

1. Turn off the projector and unplug the power cord from the outlet. Remove any dust on the projector and around the air vents. Loosen the two captive screws that secure the filter cover.

2. Remove the filter module from the projector.

3. Replace the new filter module with the filter cover.

4. Replace the filter cover into the projector by pushing gently in the direction shown.

5. Tighten the screws.

Note:

Do not wash the filter with the water or other liquid matter.

Resetting the filter timer

6. After the startup logo, open the On-Screen Display (OSD) menu. Go to the **SYSTEM SETUP: Basic > Operation Settings > Filter Settings** menu. Press **ENTER**. The Filter Settings page displays. Highlight **Reset Filter Timer**. A warning message displays asking if you want to reset the filter timer. Highlight **Reset** and press **ENTER**. The filter time will be reset to '0'.

Troubleshooting

Troubleshooting

The projector does not turn on.

Cause	Remedy
There is no power from the power cable.	Plug the power cord into the AC inlet on the projector, and plug the power cord into the power outlet. If the power outlet has a switch, make sure that it is switched on.
Attempting to turn the projector on again during the cooling process.	Wait until the cooling down process has completed.

No picture.

Cause	Remedy
The video source is not turned on or connected correctly.	Turn the video source on and check that the signal cable is connected correctly.
The projector is not correctly connected to the input signal device.	Check the connection.
The input signal has not been correctly selected.	Select the correct input signal with the SOURCE key on the projector or remote control.

Blurred image.

Cause	Remedy
The projection lens is not correctly focused.	Adjust the focus of the lens using the focus ring.
The projector and the screen are not aligned properly.	Adjust the projection angle and direction as well as the height of the unit if necessary.
The lens cover is still closed.	Open the lens cover.

Remote control does not work.

Cause	Remedy
The battery is out of power.	Replace the battery with new one.
There is an obstacle between the remote control and the projector.	Remove the obstacle.
You are too far away from the projector.	Stand within 7 meters (23 feet) of the projector.

The password is incorrect.

Cause	Remedy
You do not remember the password.	<ol style="list-style-type: none"> 1. Press and hold AUTO on the projector or remote control for 3 seconds. The projector will display a coded number on the screen. 2. Write down the number and turn off your projector. 3. Seek help from the local BenQ service center to decode the number. You may be required to provide proof of purchase documentation to verify that you are an authorized user of the projector.

12VDC (Max. 0.2 A) x 1

LAN control

RJ45 x 1

Wired Remote

PC audio jack x 2 (In / Out)

Input terminals

Computer input

RGB input

3D Sync in x 1

D-Sub 15-pin (female) x 1

BNC x 5

Digital input

DVI-D x 1

Video signal input

COMPONENT

D-Sub 15-pin (female) x 1

BNC x 3

VIDEO

RCA jack x 1

SD/HDTV signal input

Digital - HDMI x 1

HDMI 2 x 1

RJ45 x1 (HDBaseT)

Audio signal input

Audio in

PC audio jack x 1

RCA audio jack (L/R) x 1

Environmental Requirements

Operating temperature

0°C–40°C at sea level

Operating relative humidity

10%–90% (without condensation)

Operating altitude

0–1499 m at 0°C–35°C

1500–3000 m at 0°C–30°C (with High
Altitude Mode on)

Storage temperature

-20°C–60°C

Storage humidity

10%–90% RH (without condensation)

Note:

All specifications are subject to change without notice.

Dimensions

Attaching for ceiling mount

Appendix

Timing table

Supported timing for PC & PC 2 input

Resolution	Mode	Refresh Rate (Hz)	H Frequency (kHz)	Clock (MHz)	3D Frame Sequential	3D Top Bottom	3D side-by-side

Function	Type	Operation	ASCII
Operation Settings	Write	Projector Position-Front Table	<CR>*pp=FT#<CR>
	Write	Projector Position-Rear Table	<CR>*pp=RE#<CR>
	Write	Projector Position-Rear Ceiling	<CR>*pp=RC#<CR>
	Write	Projector Position-Front Ceiling	<CR>*pp=FC#<CR>
	Read	Projector Position Status	<CR>*pp=?#<CR>
	Write	Quick auto search	<CR>*QAS=on#<CR>
	Write	Quick auto search	<CR>*QAS=off#<CR>
	Read	Quick auto search status	<CR>*QAS=?#<CR>
	Write	Menu Position - Center	<CR>*menuposition=center#<CR>
	Write	Menu Position - Top - Left	<CR>*menuposition=tl#<CR>
	Write	Menu Position - Top - Right	<CR>*menuposition=tr#<CR>
	Write	Menu Position - Bottom - Right	<CR>*menuposition=br#<CR>
	Write	Menu Position - Bottom - Left	<CR>*menuposition=bl#<CR>
	Read	Menu Position Status	<CR>*menuposition=?#<CR>
	Write	Direct Power On - on	<CR>*directpower=on#<CR>
	Write	Direct Power On - off	<CR>*directpower=off#<CR>
	Read	Direct Power On - Status	<CR>*directpower=?#<CR>
	Write	Signal Power On - on	<CR>*autopower=on#<CR>
	Write	Signal Power On - off	<CR>*autopower=off#<CR>
	Read	Signal Power On - Status	<CR>*autopower=?#<CR>
Baud Rate	Write	2400	<CR>*baud=2400#<CR>
	Write	4800	<CR>*baud=4800#<CR>
	Write	9600	<CR>*baud=9600#<CR>
	Write	14400	<CR>*baud=14400#<CR>
	Write	19200	<CR>*baud=19200#<CR>
	Write	38400	<CR>*baud=38400#<CR>
	Write	57600	<CR>*baud=57600#<CR>
	Write	115200	<CR>*baud=115200#<CR>
	Read	Current Baud Rate	<CR>*baud=?#<CR>
Lamp Control	Read	Lamp Hour	<CR>*ltim=?#<CR>
	Write	Normal mode	<CR>*lampm=lnor#<CR>
	Write	Eco mode	<CR>*lampm=eco#<CR>
	Write	Dimming mode	<CR>*lampm=dimming#<CR>
	Write	Custom mode	<CR>*lampm=custom#<CR>
	Write	Light level for custom mode	<CR>*lampcustom=value#<CR>
	Read	Light level status for custom mode	<CR>*lampcustom=?#<CR>
	Read	Lamp Mode Status	<CR>*lampm=?#<CR>

Function	Type	Operation	ASCII
Miscellaneous	Read	Model Name	<CR>*modelName=?#<CR>
	Read	System F/W Version	<CR>*sysfwversion=?#<CR>
	Read	Scaler F/W Version	<CR>*scalerfwversion=?#<CR>
	Read	Lan F/W Version	<CR>*lanfwversion=?#<CR>
	Read	MCU F/W Version	<CR>*mconfwversion=?#<CR>
	Write	Blank On	<CR>*blank=on#<CR>
	Write	Blank Off	<CR>*blank=off#<CR>
	Read	Blank Status	<CR>*blank=?#<CR>
	Write	Freeze On	<CR>*freeze=on#<CR>
	Write	Freeze Off	<CR>*freeze=off#<CR>
	Read	Freeze Status	<CR>*freeze=?#<CR>
	Write	Menu On	<CR>*menu=on#<CR>
	Write	Menu Off	<CR>*menu=off#<CR>
	Read	Menu Status	<CR>*menu=?#<CR>
	Write	Up	<CR>*up#<CR>
	Write	Down	<CR>*down#<CR>
	Write	Right	<CR>*right#<CR>
	Write	Left	<CR>*left#<CR>
	Write	Enter	<CR>*enter#<CR>
	Write	Back	<CR>*back#<CR>
	Write	Source Menu On	<CR>*sourmenu=on#<CR>
	Write	Source Menu Off	<CR>*sourmenu=off#<CR>
	Read	Source Menu Status	<CR>*sourmenu=?#<CR>
	Write	3D Sync Off	<CR>*3d=off#<CR>
	Write	3D Auto	<CR>*3d=auto#<CR>
	Write	3D Sync Top Bottom	<CR>*3d=tb#<CR>
	Write	3D Sync Frame Sequential	<CR>*3d=fs#<CR>
	Write	3D Frame packing	<CR>*3d=fp#<CR>
	Write	3D Side by side	<CR>*3d=sbs#<CR>
	Write	3D inverter disable	<CR>*3d=da#<CR>
	Write	3D inverter	<CR>*3d=iv#<CR>
	Write	3D nVIDIA	<CR>*3d=nvidia#<CR>
	Read	3D Sync Status	<CR>*3d=?#<CR>
	Write	Remote Receiver - front+rear	<CR>*rr=fr#<CR>
Write	Remote Receiver - front	<CR>*rr=f#<CR>	
Write	Remote Receiver - rear	<CR>*rr=r#<CR>	
Read	Remote Receiver Status	<CR>*rr=?#<CR>	

Function	Type	Operation	ASCII
Miscellaneous	Write	AMX Device Discovery - on	<CR>*amxdd=on#<CR>
	Write	AMX Device Discovery - off	<CR>*amxdd=off#<CR>
	Read	AMX Device Discovery Status	<CR>*amxdd=?#<CR>
	Read	Mac Address	<CR>*macaddr=?#<CR>
	Write	High Altitude mode on	<CR>*Highaltitude=on#<CR>
	Write	High Altitude mode off	<CR>*Highaltitude=off#<CR>
	Read	High Altitude mode status	<CR>*Highaltitude=?#<CR>
Color Calibration	Write	Tint +	<CR>*tint=+#<CR>
	Write	Tint -	<CR>*tint=-#<CR>
	Write	Set Tint value	<CR>*tint=value#<CR>
	Read	Get Tint value	<CR>*tint=?#<CR>
	Write	Set gamma value	<CR>*gamma=value#<CR>
	Read	Gamma value status	<CR>*gamma=?#<CR>
	Write	Set HDR Brightness value	<CR>*hdrbri=value#<CR>
	Read	Get HDR Brightness value	<CR>*hdbri=?#<CR>
	Write	Red Gain +	<CR>*RGain=+#<CR>
	Write	Red Gain -	<CR>*RGain=-#<CR>
	Write	Set Red Gain value	<CR>*RGain=value#<CR>
	Read	Get Red Gain value	<CR>*RGain=?#<CR>
	Write	Green Gain +	<CR>*GGain=+#<CR>
	Write	Green Gain -	<CR>*GGain=-#<CR>
	Write	Set Green Gain value	<CR>*GGain=value#<CR>
	Read	Get Green Gain value	<CR>*GGain=?#<CR>
	Write	Blue Gain +	<CR>*BGain=+#<CR>
	Write	Blue Gain -	<CR>*BGain=-#<CR>
	Write	Set Blue Gain value	<CR>*BGain=value#<CR>
	Read	Get Blue Gain value	<CR>*BGain=?#<CR>
	Write	Red Offset +	<CR>*ROffset=+#<CR>
	Write	Red Offset -	<CR>*ROffset=-#<CR>
	Write	Set Red Offset value	<CR>*ROffset=value#<CR>
	Read	Get Red Offset value	<CR>*ROffset=?#<CR>
	Write	Green Offset +	<CR>*GOffset=+#<CR>
	Write	Green Offset -	<CR>*GOffset=-#<CR>
	Write	Set Green Offset value	<CR>*GOffset=value#<CR>
	Read	Get Green Offset value	<CR>*GOffset=?#<CR>

Function	Type	Operation	ASCII
Color Calibration	Write	Blue Offset +	<CR>*BOffset=+#<CR>
	Write	Blue Offset -	<CR>*BOffset=-#<CR>
	Write	Set Blue Offset value	<CR>*BOffset=value#<CR>
	Read	Get Blue Offset value	<CR>*BOffset=?#<CR>
	Write	Primary Color	<CR>*primcr=value#<CR>
	Read	Primary Color Status	<CR>*primcr=?#<CR>
	Write	Hue +	<CR>*hue=+#<CR>
	Write	Hue -	<CR>*hue=-#<CR>
	Write	Set Hue value	<CR>*hue=value#<CR>
	Read	Get Hue value	<CR>*hue=?#<CR>
	Write	Saturation +	<CR>*saturation=+#<CR>
	Write	Saturation -	<CR>*saturation=-#<CR>
	Write	Set Saturation value	<CR>*saturation=value#<CR>
	Read	Get Saturation value	<CR>*saturation=?#<CR>
	Write	Gain +	<CR>*gain=+#<CR>
	Write	Gain -	<CR>*gain=-#<CR>
	Write	Set Gain value	<CR>*gain=value#<CR>
	Read	Get Gain value	<CR>*gain=?#<CR>
Service	Read	Error Code report	<CR>*error=report#<CR>
	Read	FAN 1 speed	<CR>*fan1=?#<CR>
	Read	FAN 2 speed	<CR>*fan2=?#<CR>
	Read	FAN 3 speed	<CR>*fan3=?#<CR>
	Read	FAN 4 speed	<CR>*fan4=?#<CR>
	Read	FAN 5 speed	<CR>*fan5=?#<CR>
	Read	Temperature 1	<CR>*tmp1=?#<CR>
	Read	Temperature 2	<CR>*tmp2=?#<CR>
	Read	Temperature 3	<CR>*tmp3=?#<CR>
	Read	LED indicator	<CR>*led=?#<CR>
