Conference Name Plate

Efficiently arrange a meeting with electronic name plate

Double-sided
screen

Stable
performance

Environmental
protection

Quick
deployment

Features

VIS-NP10T
10" conference name plate

The 10" name plate adopts a 1600x600 capacitive touch screen, an integrally formed all-aluminum base, and a transparent high-grade plexiglass frame to create such elegant interface and provide a sensitive touch experience. It's a perfect device to modern meeting room integrate with conference system.

The double-sided high-resolution screen can display different content, and all content can be easily edited on the software and can be saved after power off, providing an environmentally friendly solution for the information display of conference participants. The built-in meeting management function can quickly change the participant information before the next meeting begins.

Features

- High-grade glass material with clear LCD double-sided touch screen, true color display.
- User-friendly software for transferring pictures and text, and supports power-off content storage.
- True color display to maximize legibility, high refresh rate to prevent flickering in video.
- The whole system is connected by CAT5 network cables, also supports DC12V connector power supply.
- The weight of the product and base design provide perfect support, and it is not easy to knock down on the desktop.

Technical Parameters

Screen	TFT true color display, double side
Resolution	1600x600
Contrast	1200:1
Brightness	450 Lumen
Power	POE 48V
Material	Aluminum and glass
Color	Silver
Control	Web control interface
Device Size(mm)	273Lx143Hx103W
Screen Size(mm)	258Lx113Hx135W
Weight	1.5KG

VIS-NP7
7" conference name plate

The 7" name plate adopts a 1024x600 screen, an integrally formed all-aluminum base, and a transparent highgrade plexiglass frame to create such elegant interface. It's a perfect device to modern meeting room integrate with conference system.

The double-sided high-resolution screen can display different content, and all content can be easily edited on the software and can be saved after power off, providing an environmentally friendly solution for the information display of conference participants. The built-in meeting management function can quickly change the participant information before the next meeting begins.

Features

- High-grade glass material with clear LCD double-sided screen, true color display.
- User-friendly software for transferring pictures and text, and supports power-off content storage.
- True color display for maximum legibility, high refresh rate to prevent flickering in video.
- The whole system is connected by CAT5 network cables, and the wiring is simple. Also supports DC12V connector power supply.
- The weight of the product and the base design provide perfect support, and it is not easy to knock down on the desktop.

Technical Parameters

Screen	TFT true color display, double side
Resolution	1024x600
Contrast	1200:1
Brightness	450 Lumen
Power	POE 48V
Material	Aluminum and glass
Color	Silver
Control	Web control interface
Device Size(mm)	205Lx143Hx103W
Screen Size(mm)	190Lx113Hx95W
Weight	1KG

Features

VIS-NCU1000
Control unit with web interface

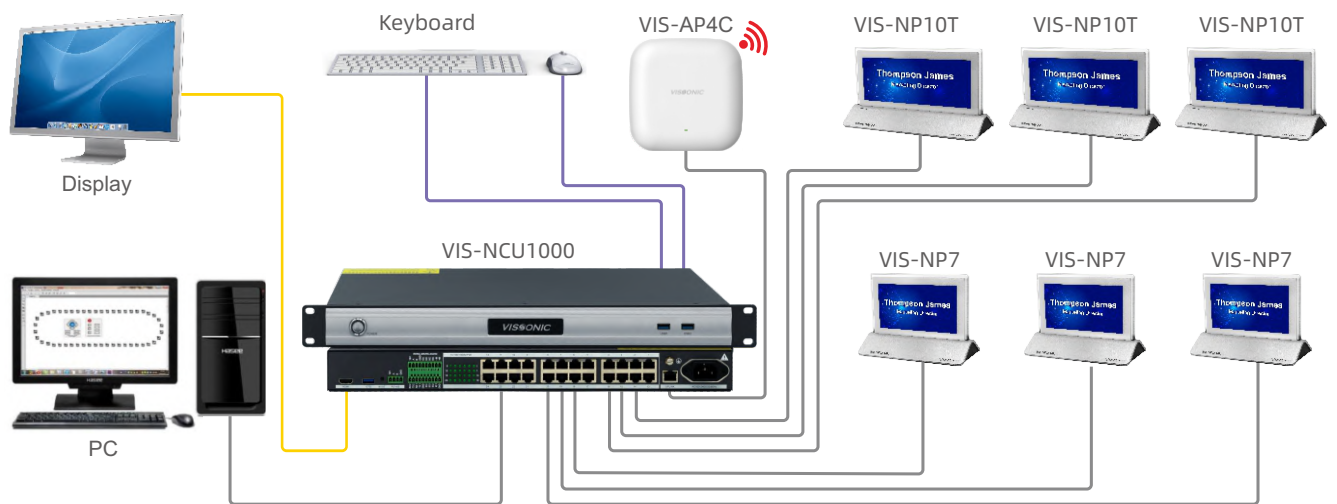

Features

- Web page for easy manage the content of name plate.
- High speed CPU and 16G RAM.
- Connect monitor and keyboard to it directly for operation.
- Support POE and can cascade with more hub switch for expansion.
- Two front USB ports, which can be operated locally through the USB keyboard and mouse. At the same time, use flash driver to read customized background images.

Technical Parameters

Network port	24x 10/100/1000M RJ45 interface, standard PoE power supply
Serial port	1xRS485
Link port	1x RJ45 for AP
USB port	2x USB port for keyboard mouse
Power	AC 90~240V 50/60Hz power button with indicator
Memory	16G RAM
Video port	1xHDMI out
Dimension(mm)	483L x 260W x43.6H
Weight	3.7KG
