InstaShow® VS20

Wireless Videoconferencing Solution for Hybrid Meetings

VS20 supports both **BYOD** and **BYOM**, making it a suitable wireless companion for hybrid meeting collaborations.

With VS20, you can share content from your laptop to a meeting room display or projector without disruptions.

To get it up and running, connect the receiver, plug in the transmission button to your laptop, and cast your screen at a press of a button.

Enhanced Connectivity & Collaboration

VS20 facilitates BYOD by enabling seamless connectivity through HDMI or USB-C outputs on Windows laptops and MacBooks. Share your content with this plug & play device without installing apps or software. If you are using mobile devices, you can cast your screen via AirPlay or Miracast without using the button.

VS20 also improves collaboration thanks to its touchback feature so you can control the sharing content right from the display.

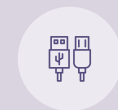

4K Video Clarity

The native 4K video transmission output at 60fps delivers exceptional clarity and smoothness.

Native Extended Screen

Present on a native extended screen with a click of the button while having your notes readily accessible on your laptop's screen.

Versatile Connectivity

VS20 comes with a default USB-C, which can be switched with an HDMI cable, allowing for optimal flexibility.

Seamless Audiovisual Integration

With the advanced audiovisual integration feature, you can connect to the room camera and microphone while hosting the video conference from your laptop, with your preferred video conferencing software like Microsoft Teams, Zoom, and Webex.

To set it up, you just need to connect the room camera to the VS20 receiver via a USB cable, install the BenQ InstaShow® VS Assist APP on your laptop, and plug in the transmission button to your laptop to start the video call.

Built-in Microphone

The built-in omnidirectional microphone offers clear audio transmission and an individual mute key for added convenience and control.

Package Content

VS20 system comes with these items:
