

Having tools which are made to measure for the projection environment is the best way to obtain effective communication. When it comes to projecting in large spaces the best solution is Alumax, the screen devised especially for large-scale applications. Alumax is equipped with a built-in 150 mm diameter aluminium roller - specifically designed to roll very large surfaces - contained in a special case which is open underneath: these two features ensure the perfect planarity of the projection surface. Alumax is extremely practical to install, owing to the quick and easy assembly system. In other words, a magnet for the audience, even in the most challenging places.

**Create your own screen with the PSS:**

- > **personalized dimensions:** width and height
- > **roller type:** standard motorized
- > **case:** with standard case or without case
- > **case color:** available black or white
- > **projection surfaces:** VisionWhite, VisionAcoustik, Vision MacroAcoustik and VisionRear DB
- > **projection surface drop:** front or rear
- > **side of command/motor:** right or left

**Standard accessories:**

- > kit with wall -or ceiling- quick mount brackets
- > unipolar selector switch

**Optional accessories:**

- > receiver and RF remote control for motorized screen (3 modalities: basic, automatic and compatible with domotic systems)
- > receiver and infrared remote control
- > bracket extensions for screens up to 60 cm
